

Download Algebraically Approximate And Noisy Realization Of Discrete Time Systems And Digital Images

Algebraically Approximate and Noisy Realization of Discrete-Time Systems and Digital Images Hardcover – Sep 21 2009 Part I and Part II will deal with approximation and noise cancellation of dynamical systems or digital images respectively. From noiseless or noisy data, reduction will be made. A method which reduces model information or noise was proposed in the reference vol. 376 in LNCIS [Hasegawa, 2008]. Using this method will allow model description to be treated as noise reduction or model reduction ...
