

# Download Answer On Properties Of Light Conceptual Physics

You get an idea of how incredible these distances are when you know that light travels at a pretty good clip of 186,000 miles in a second! A video instructional series on physics for college and high school classrooms and adult learners; 52 half-hour video programs and coordinated books Answers.com is the place to go to get the answers you need and to ask the questions you want (Phys.org)—Light behaves both as a particle and as a wave. Since the days of Einstein, scientists have been trying to directly observe both of these aspects of light at the same time.
