

# **Download Childbirth And Postnatal Care Management Of Critical Care Miscarriages And Diseases**

Pregnancy, also known as gestation, is the time during which one or more offspring develops inside a woman. A multiple pregnancy involves more than one offspring, such as with twins. Pregnancy can occur by sexual intercourse or assisted reproductive technology. Childbirth typically occurs around 40 weeks from the last menstrual period (LMP). The NHS Data Model and Dictionary provides a reference point for assured information standards to support health care activities within the NHS in England. The Obstetrics and Gynaecology department is specialized in ante natal care of expectant mothers, gynaecological problems, problems associated with menarche and menopause, infertility, loop insertion and removal, etc. We're home to state-of-the-art technologies, leading edge options and exceptional physicians.
