

# Download Complete Loran-c Handbook

Loran-C was a hyperbolic radio navigation system that allowed a receiver to determine its position by listening to low frequency radio signals transmitted by fixed land-based radio beacons. Practical Navigation Principles. Effect of wind. The preceding discussion on the Navigation Basics page explained how to measure a true course on the aeronautical chart and how to make corrections for variation and deviation, but one important factor has not been considered—wind. Chaque station Loran-C émet un train de huit ou neuf impulsions d'une dizaine de périodes chacune, précisément calibrées, occupant la bande 90 à 110 kHz.
