

Download Construction Labor Productivity Management A Summary

Construction managers typically must have a bachelor's degree, and learn management techniques through on-the-job training. Large construction firms increasingly prefer candidates with both construction experience and a bachelor's degree in a construction-related field. The construction industry employs about 7 percent of the world's working-age population and is one of the world economy's largest sectors, with \$10 trillion spent on construction-related goods and services every year. But the industry has an intractable productivity problem and, according to Management Summary. The company's management philosophy will be based on responsibility and mutual respect. Concrete Installation will maintain an environment and structure that will encourage productivity and respect for customers and fellow employees. Project management is an increasingly important part of construction. Project managers are intermediaries between stakeholders and construction workers.
