MATLAB: A Practical Introduction to Programming and Problem Solving, winner of TAA's 2017 Textbook Excellence Award ("Texty"), guides the reader through both programming and built-in functions to easily exploit MATLAB's extensive capabilities for tackling engineering and scientific problems. Transform Methods for Solving Partial Differential Equations, Second Edition by Dean G. Duffy (Chapman & Hall/CRC) illustrates the use of Laplace, Fourier, and Hankel transforms to solve partial differential equations encountered in science and engineering. There is also Solutions Electrical, for example for the power factor calculation, but also other electrical engineering topics. It seems correct, but it is not free, so I have not tried it. Department of Computer Engineering Computer engineering department established in the year 2002 with undergraduate course. The Department has sanctioned intake of 60 students.
