

Download Greening Environmental Policy : The Politics Of A Sustainable Future

Sustainable development is the organizing principle for meeting human development goals while at the same time sustaining the ability of natural systems to provide the natural resources and ecosystem services upon which the economy and society depend. Sustainability is the process of maintaining change in a balanced environment, in which the exploitation of resources, the direction of investments, the orientation of technological development and institutional change are all in harmony and enhance both current and future potential to meet human needs and aspirations. For many in the field ...The Guide to Greening Cities [Sadhu Afochs Johnston, Steven S. Nicholas, Julia Parzen] on Amazon.com. *FREE* shipping on qualifying offers. Superstorm Sandy sent a strong message that a new generation of urban development and infrastructure is desperately needed JSTOR is a digital library of academic journals, books, and primary sources.
