

Download Human Memory V : Theory And Data

A Theory of Human Motivation A. H. Maslow (1943) Originally Published in Psychological Review, 50, 370-396. Memory is the faculty of the brain by which information is encoded, stored, and retrieved when needed.

Memory is vital to experiences, it is the retention of information over time for the purpose of influencing future action. If we could not remember past events, we could not learn or develop language, relationships, or personal identity ...Eyewitness memory is a person's episodic memory for a crime or other dramatic event that he or she has witnessed. Eyewitness testimony is often relied upon in the judicial system. This chapter presents a general theoretical framework of human memory and describes the results of a number of experiments designed to test specific models that can be derived from the overall theory.
