

Download On The Evolution Of Human Behavior The Argument From Animals To Man

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes. Human evolution is a rapidly-changing field, with the regular discovery of new fossil material leading scientists to constantly reconsider evolutionary relationships. This section is an overview of current knowledge of human ancestors, but also presents information on trends in human evolution and the use of DNA technology to examine our past ...Fulfillment by Amazon (FBA) is a service we offer sellers that lets them store their products in Amazon's fulfillment centers, and we directly pack, ship, and provide customer service for these products. Although “Man the Hunter” is a popular description of our ancestry, the central importance of hunting is firmly fixed only in the archeological record of relatively recent human history.
